

# Harmony Software Technologies JSC

---

[www.harmonysoft.com.vn/en](http://www.harmonysoft.com.vn/en)

We always strive to provide quality products and satisfaction services to our customers both in Vietnam and internationally.

## The leading provider of ERP and PLM system for construction industry in Vietnam.

Harmony, founded in May 1994, focuses on research and production of technical software for construction industry. Over 20 years, Harmony has grown into a system of multi-member companies doing research, develop and deliver integrated IT solutions for domestic and global market.

### Our Mission

Grow with Harmony.

Nowadays, harmonious growth is always the target of any nation and organization in the digital era. Harmony desires to become your trusted partner and always goes closely with your business.

### Our Vision

To become an international software company.

Each member in Harmony constantly strives to develop the company into Vietnam's leading provider of integrated solutions and software products in the field of project management (Product Lifecycle Management), automation design, create and exploit GIS database, etc based on innovation, application of advanced technology and close association with customer's professional work.

### Customers and Partners

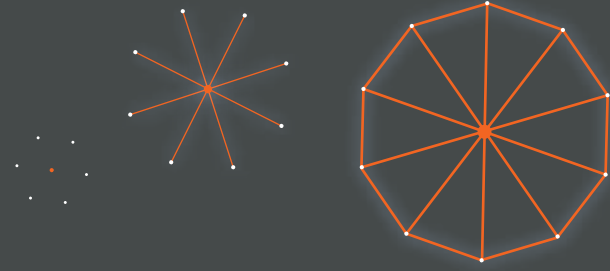

Domestically, we are proud provider of many national ministries as well as national and international corporations in Vietnam. Internationally, we formed partnership and joint venture with a number of well-known names in the industries.

#### International Partners

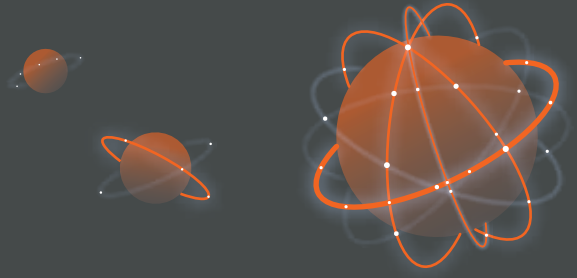

## ERP and PLM

As the leading provider in Vietnam in ERP and PLM system for construction industry, Harmony consistently endeavors to meet the needs and demands of different groups of customers such as investors, contractors and sub-contractors.

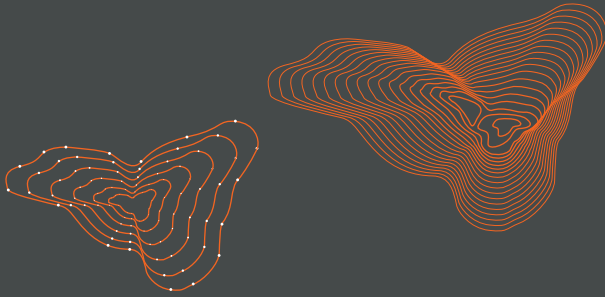

## IT Infrastructure

At Harmony, we offer services of consultation, setting up and maintaining IT infrastructure. Additionally, we consult and supply Integrated Data Centre and Information Integrated Systems.

## Automated Engineering

Here at Harmony, we have years of researching and developing automated engineering software for infrastructure and factories with BIM concept. Notably in this field is Vianova Vietnam, a joint Venture Enterprise between Vianova Systems AS (Norway), Harmony Software Technologies JSC (Vietnam) and Vianova Systems OY (Finland).

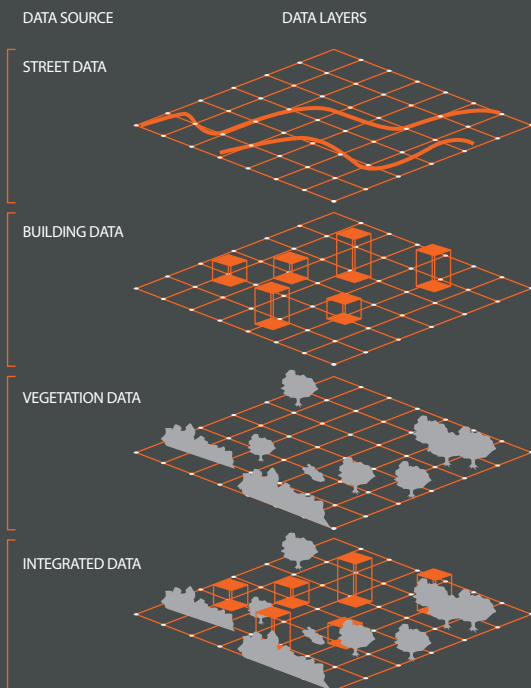

## Outsourcing Services

We assure high performance through consulting services, collaborative research and development for IT services for both inside and outside Vietnam.

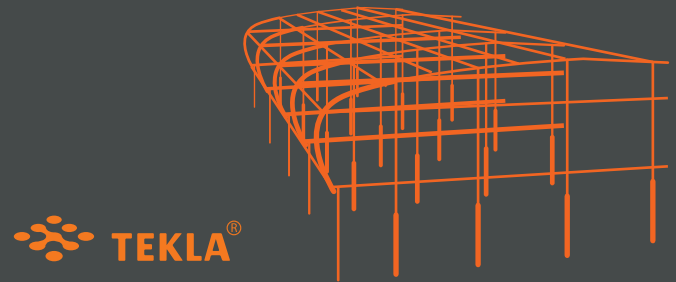

## GIS, WebGIS

Our company provides GIS application software development and several GIS, WebGIS services for professionals in the fields of land management, environment and urban planning, provision of maps, telecommunications, etc.

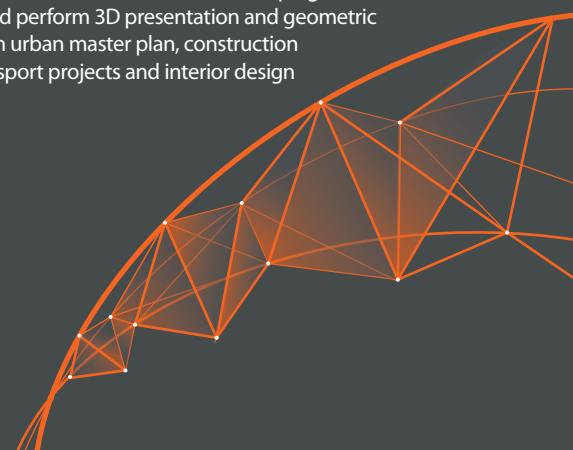

## Authorised Distributor

Selective members in Network are authorised distributor of some leading names in consulting and providing BIM solutions for construction industry.

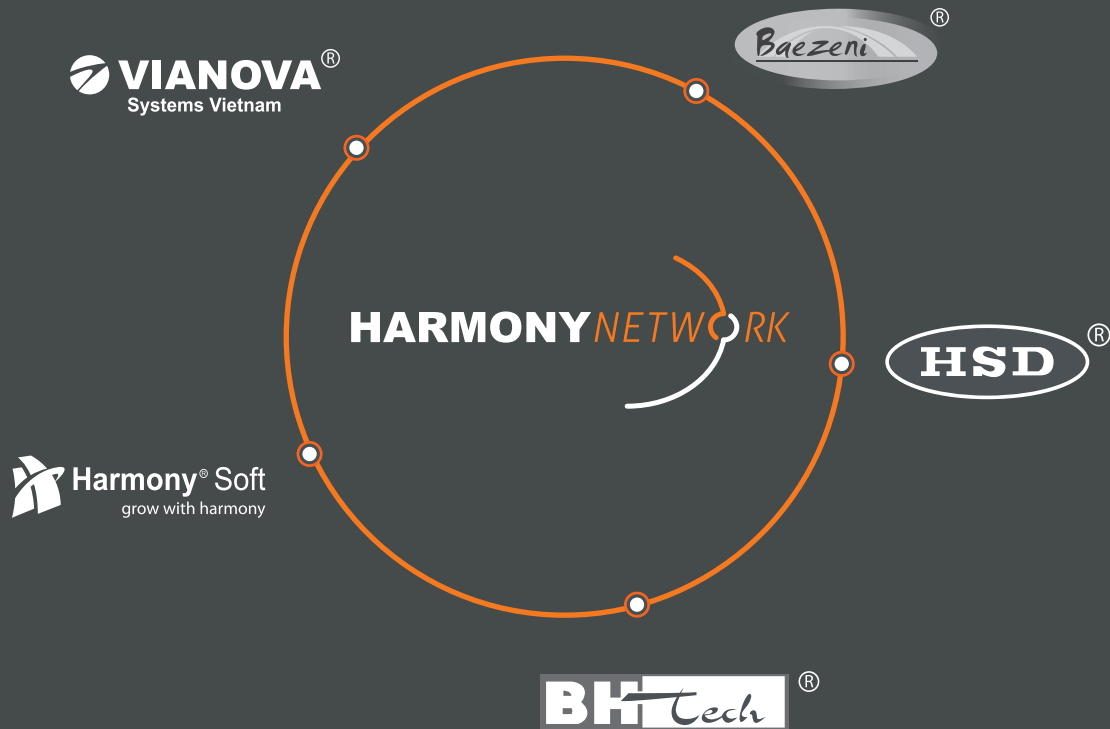

## 3D Modeling

3D models are now used in a wide variety of fields and play an important role in architectural design and construction. Therefore, we devote our resources in developing software that create and perform 3D presentation and geometric design used in urban master plan, construction building, transport projects and interior design

# Harmony Network - A comprehensive and dynamic network of companies that specialised in:

- IT applications based on BIM, PLM and GIS technology.
- Services for consulting, implementation and monitoring IT projects.
- Software training, technology transfer, and 3D data services.
